## VIRON<sup>3</sup>

SAFE. INTUITIVE. COMFORTABLE.

A playful introduction to kitesports! Harness your enthusiasm from the first minute. Maximise your learning curve with this unique depower foil kite concept allowing you to quickly build trust whilst our B-Safe system keeps you safe. This kite is a must-have for safety-conscious teachers and ambitious students.

<b>TECHNOLOGY:</b>	Closed-Cell Foil Kite
<b>FOCUS:</b>	Progression
<b>SKILLS:</b>	Beginner
<b>SIZES:</b>	4 / 6 / 8

## FEATURES

### B-SAFE SYSTEM

When activated the B-Safe system reefs the kite along the A-level bridles to bring it down safely with very little remaining pull from the kite. The system can easily be reactivated on water, land or snow.

### AUTO-RELAUNCH

The VIRON automatically relaunches with only a slight input from the steering lines and can be parked on the edge of the wind window.

### SIMPLE BRIDLE CONCEPT (A+Z)

The VIRON features a very minimal bridle layout with just an A level and Z level. Pulleys on each tip increase bar feedback when steering. The flattening of the leading edge reduces surges in power when flying the kite across the window.

### IMPACT ABSORBING TECHNOLOGY

The elastic internal construction of the kite allows absorbing of energy during an impact. The materials used have elastic and abrasion resistant properties which together with bonded double seams and reinforcements in stress zones improve durability.

### AUTOMATIC DRAINAGE SYSTEM

Openings in the wing tips allow water, sand, snow and dirt to be drained automatically, without influencing the performance of the kite.

### ANTI-INVERT ROPE

A special cross-line which prevents the kite from inverting, which can cause the lines to get caught.

### SELF INFLATABLE

The rigidfoils around the air intakes improve the VIRON's self inflation and allow it to keep its shape better when turning and make it more reactive.

### TOTAL PACKAGE:

- 1x VIRON3 Kite only
- 1x CONNECT Control Bar
- 1x Universal Kite Bag
- 1x Kite Safety Guide

**„THE VIRON MAKES YOUR DAILY BUSINESS SIMPLE. TEACHING HAS NEVER BEEN SO COMFORTABLE.“**

#### HIGHLIGHTS

- ▶ Safest closed-cell foil kite on the market
- ▶ The best kite for teaching children
- ▶ Enormous range of use
- ▶ Extremely durable

## FAQ

### The B-Safe System

Kiteboarding is an extreme sport and we are aware of the high risks which can be involved. The immediate loss of power and a controlled release of the kite is the outcome of our extensive safety tests. The easy reactivation makes the system even more advanced than a single front line safety.

### Which control bar can be used with the VIRON3?

The VIRON3 is equipped with the B-Safe System, and comes delivered as a „ready to fly“ package with a pre-installed CONNECT Control Bar, which was specially developed for this purpose.

### Is it possible to use the VIRON3 with shorter flying lines?

Yes, the CONNECT Control Bar has 14+7m flying lines, when you remove the extensions, you can use 14m lines for training / school / strong wind usage.

### VIRON2 vs VIRON3

The VIRON3 has an optimized bridle and a more direct steering feedback, the integrated rigidfoils and sharknose allow for faster self inflation of the kite and make the VIRON3 more safe. The all new B-Safe system, with anti-invert rope and 5th line CONNECT bar allow the VIRON3 to be even more safety optimized then it already was.
