

# FLY SURFER

## SOUL<sup>2</sup>

**SIZES:** 6 / 8 / 10 / 12 / 15 / 18 / 21

**TECHNOLOGY:** Closed-Cell Foil Kite, 4-Level Ram Air, 35 - 41 Cells, 5 - 6 Aspect Ratio

**FOCUS:** Freeride, Big-Air, Travel

**SKILLS:** Beginner - Advanced

The FLYSURFER SOUL product line appeals to all freeriders who do not set limits, like to travel, and want to rely on a safe kite. The SOUL is powerful and predictable from the get-go. It conveys constant, precise bar feedback and, thanks to its „Park & Ride“ feeling, is a brilliant first foil kite that never gets boring with increasing skills. In the hands of our professionals such as Olly Bridge, the product becomes a real big air machine that masters gap jumps and breaks woo records. While Theo de Ramecourt pushes his surfboard tricks, Laurent „Lolo“ Guyot pulls fat loops on snowy slopes, and Lewis Wilby takes Airstyle to the next level with the landboard, we go for a relaxing hydrofoil session in front of the HQ. The legendary SOUL embodies the entire spectrum of kiting and is always the right choice.

Sizes: 6 / 8  
Color: Dusty Pink

Sizes: 10 / 12  
Color: Ocean

Sizes: 15 / 18  
Color: Amber

Size: 21  
Color: White

### UPWIND ABILITY

### LEEWARD ABILITY

### OVERALL STABILITY

### EASE OF RELAUNCH

### DEPOWER

### HANGTIME

### TURNING SPEED

### BAR PRESSURE

### COMFORT

### SCOPE OF DELIVERY:

- SOUL Kite only
- UNIVERSAL Kite bag
- LIGHT Bag
- Compression Strap
- Trim Checker
- Sandbag
- Repair Kit
- Kite Safety Guide

## USP:

All-Around Performance

## HIGHLIGHTS:

EASE OF USE

EFFORTLESS BOOSTING

TX-LIGHT CONSTRUCTION

## TECHNICAL CHANGES

### TX-Light Cloth

Increased tear resistance, improved diagonal tensile strength, Triple RipS-top thread, soft and hard finish coatings, 33g / m<sup>2</sup>

### Bridle Check Tool

Black marked reference points included in the line plan for measuring the bridle lines after long-term use

### Wingtip Shape

Increases lift, improves turning and wingtip stability

### Inflation and Deflation

Increased number of cross ports that improve inflation and deflation of the kite. Enables faster launching and more convenient packing.

### Drainage system exit

45° cut-out to better drain water and dirt during the relaunch

### Trim Checker

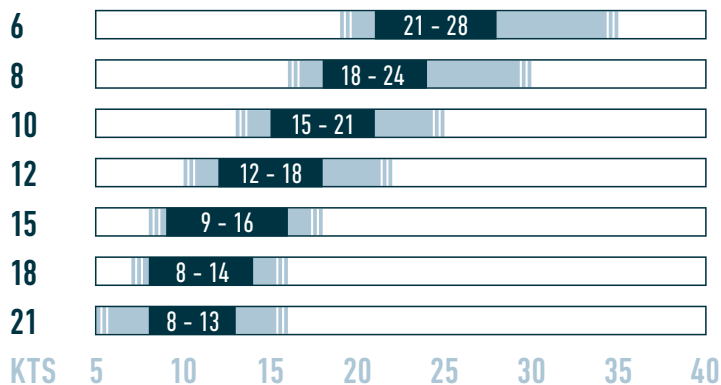

handle with splice lock and attachment points to attach the front and back main lines. Supports mixer adjusting

### Reinforced suspension points

double layer of cloth sewn around points A1, B1, C1, Z1, Z2; damage prevention in the event of shock loads

### Adapted sizes

Fine adjustment of aspect ratio and number of cells. Sizes 9 & 7 phase out.

## COMPARISON

### SOUL<sup>2</sup> vs SOUL<sup>1</sup>

The SOUL<sup>2</sup> is more durable and user-friendly. In direct comparison to its predecessor, it is easier to launch, has better handling in low wind, and sits more compact in the air. The SOUL<sup>2</sup> feels more powerful from the get-go and gives direct feedback. Experienced kites / dealers can use the Camber Trim System (Mixer) and the Profile Momentum Adjuster (PMA) to adjust the SOUL to personal preferences. Stability, power, and bar feedback remain.

### SOUL<sup>2</sup> vs SONIC<sup>3</sup>

The SOUL sits deeper in the wind window and is better suited for the first jumps, to get going, for unhooked tricks, and jibing on the hydrofoil. The overflying is lower, the wingtips are more stable and the turning is tighter (pivots less). The SOUL is the better choice especially in gusty winds and is particularly suitable in strong winds and for snow / land kiting. The SONIC needs more experience to fully exploit its strengths. We recommend the SONIC to riders for whom maximum performance is the top criteria.

## SIZE CHART

Rider weight	50-60 kg	60-70 kg	70-80 kg	80-95 kg	+95 kg
Control Bar size	S, M	S, M	M	M, L	M, L
